

How to Find Your Ring Size?

1. It is advisable to measure your ring size in the evening.
2. Make sure to measure your finger two to three different times to ensure the accuracy of your measurement.
3. The ring must slip over your knuckles comfortably, but it should stay on and not slide over the knuckle and fall off your finger. If the ring is a very tight fit, taking it off and wearing it again will be very difficult. The ring should also not be loose enough to keep turning around in your finger.

If you are measuring at a jewellery store:

1. Jewellery stores have a standard metallic or plastic ring sizer for measuring ring size. When you find the perfect fitting ring, just note down the number inscribed on the ring. This number is your ring size.
2. If you want to know the size of a ring, you can get it measured with the help of a measuring rod. Every jewellery store has it.

If you are measuring at home:

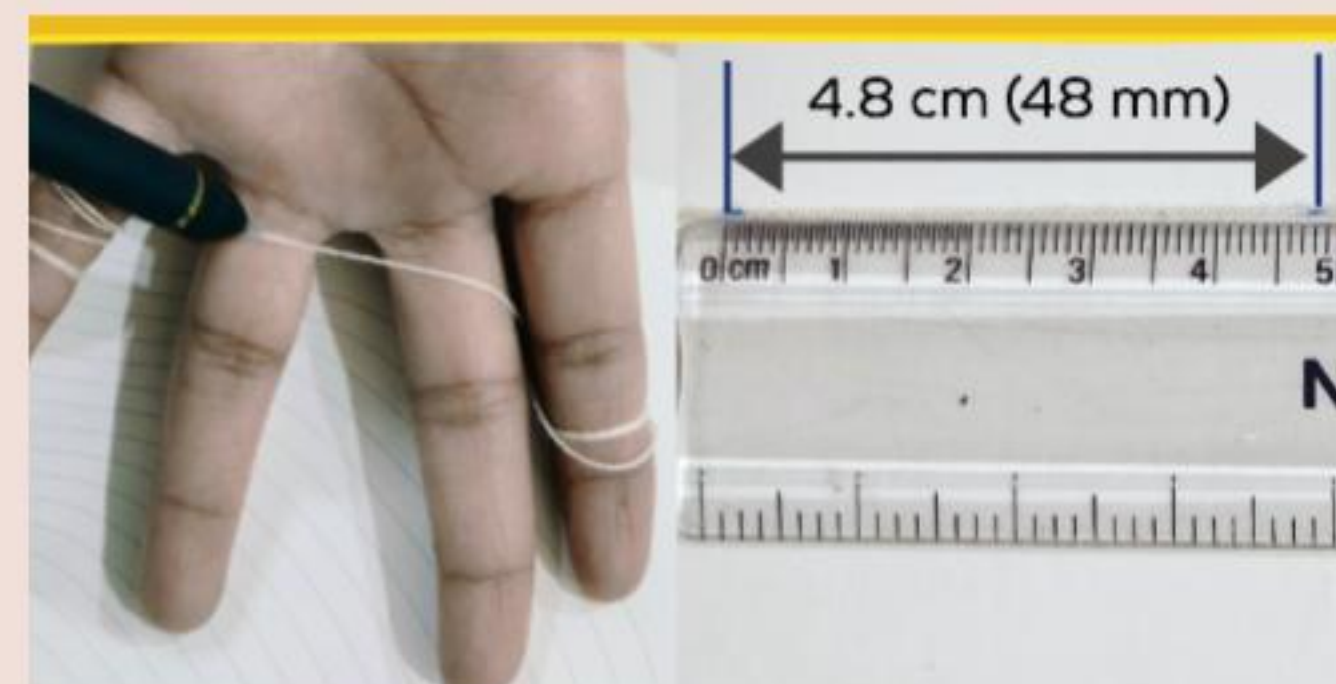

1. If you have a ring but don't know its size, measure the inside diameter of that ring. Use the given ring size chart to compare your measurement to the standard ring sizes.

Inner diameter is 17 mm, which means the ring size is 13.

2. Use a thread and wrap it around your selected finger. With a pen mark the point where the two ends of the thread meet. Keep in mind to not stretch the thread. Measure the length of that thread in millimeters with the help of a scale. Use the given ring size chart to compare your measurement to the standard ring sizes.

The length of the thread is 4.8 cm (48mm), which is the circumference of your ring. So the ring size is 8.

Ring Size Chart

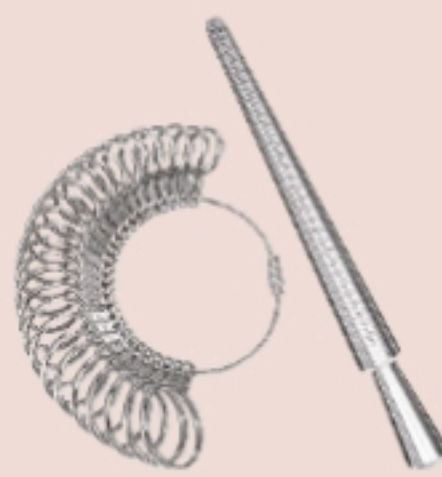

Ring Size (India)	Ring Size (USA & Canada)	Circumference of ring		Diameter of ring	
		Inches	mm	Inches	mm
1	1 1/4	1.61	41	0.52	13.1

How to Find Your Bangle Size?

If you are measuring at a jewellery store:

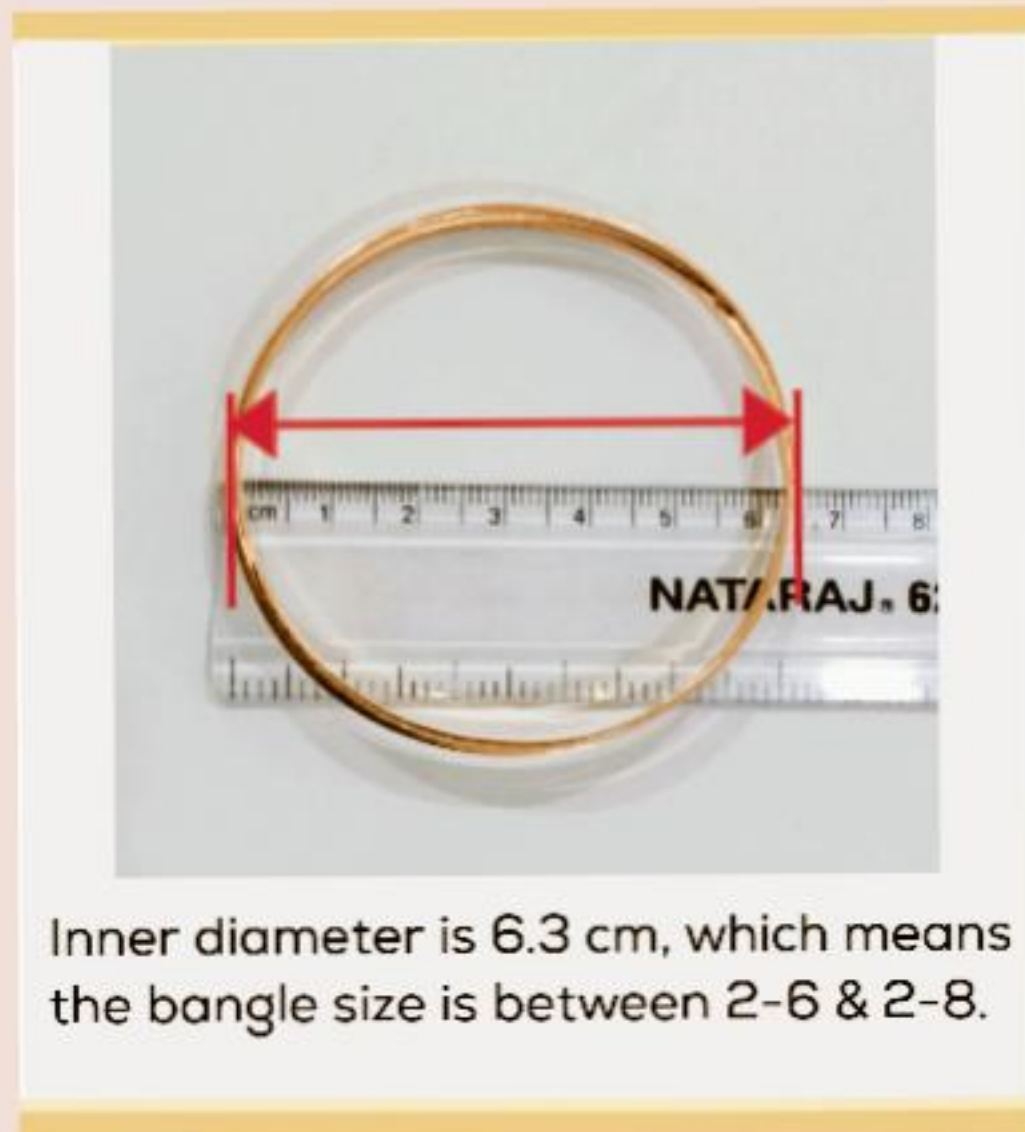

1. You can visit any jewellery store in your locality to get your bangle size.
2. If you want to know the size of any bangle that you have, you can get that measured too in the store with the help of a measuring gauge. Every jewellery store has it.

Bangle Size Chart

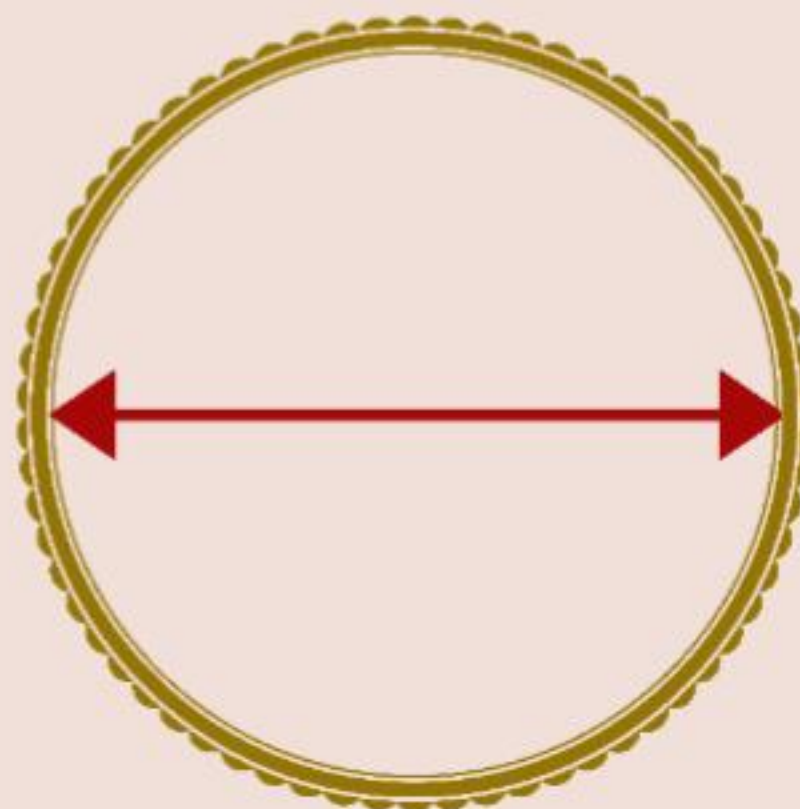

Bangle Size (India)	Circumference of bangle		Diameter of bangle	
	Inches	mm	Inches	mm
2-2	6.68	169.7	2.13	54
2-4	7.07	179.6	2.25	57.2
2-6	7.46	189.5	2.37	60.3
2-8	7.85	199.4	2.50	63.5
2-10	8.24	209.3	2.63	66.7
2-12	8.64	219.5	2.75	69.9
2-14	9.03	229.4	2.87	73
3	9.42	239.3	3.00	76.3

If you are measuring at home:

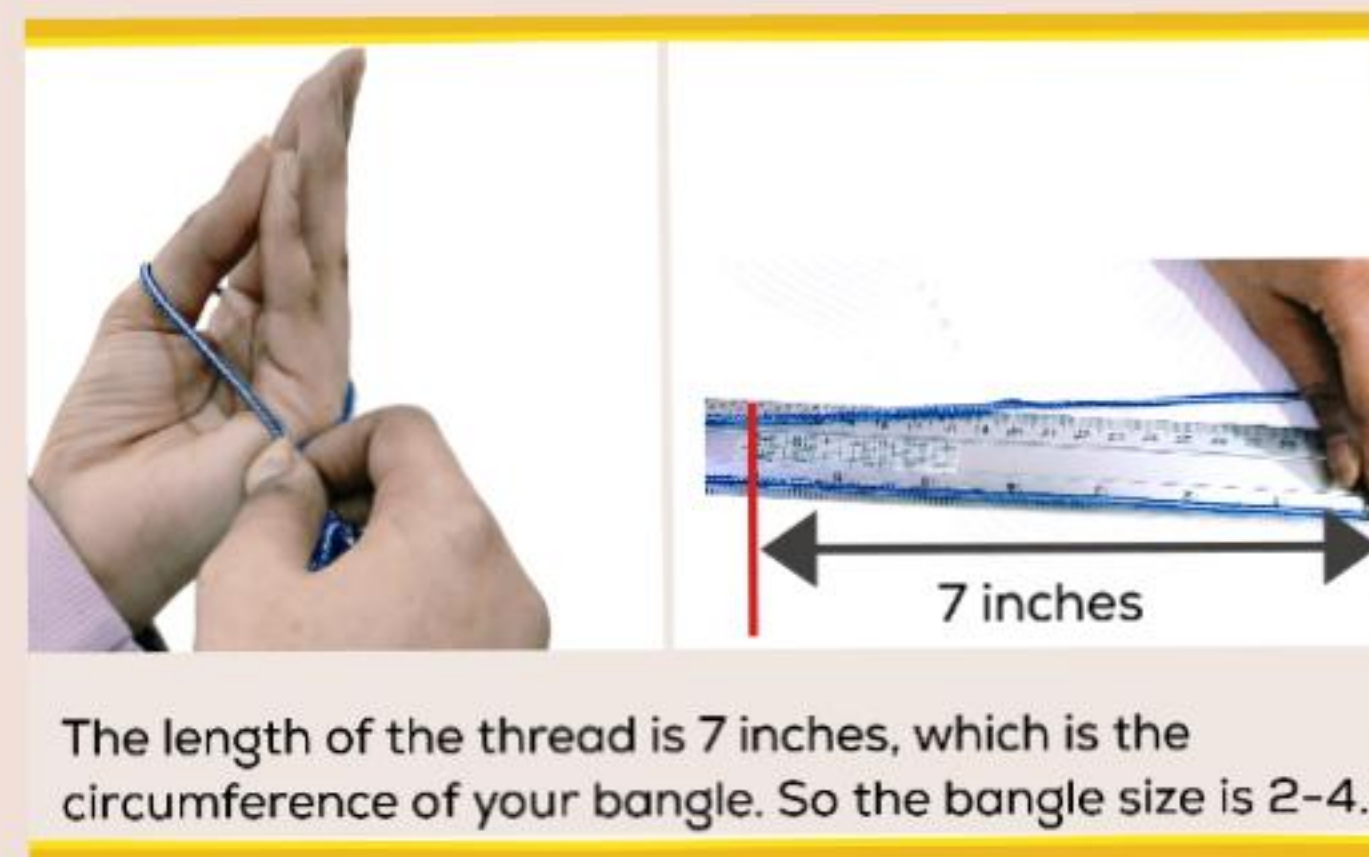

1. If you have a bangle but don't know its size, measure the inside diameter of that bangle with the help of a scale. Keep the round bangle on top of the scale placing inside edge of one side of the bangle on zero (of the scale), as shown in the figure. Use the given bangle size chart to compare your measurement to the standard bangle sizes. Keep in mind to take a round bangle with no side screws.

Inner diameter is 6.3 cm, which means the bangle size is between 2-6 & 2-8.

2. Bring your thumb and fingers together as if you are about to slip a bangle through your hand. Use a piece of thread and wrap it around your selected hand. With a pen mark the point where the two ends of the thread meet. Keep in mind to not stretch the thread. Measure the length of that thread in inches or centimeters with the help of a scale. Use the given bangle size chart to compare your measurement to the standard bangle sizes.

The length of the thread is 7 inches, which is the circumference of your bangle. So the bangle size is 2-4.

Make sure to measure two to three different times to ensure the accuracy of your measurement.
